Rca universal remote xy-2300 manual instructions pdf

1. Manually turn on the device you want to control.

Tour of the Remote

Advanced Functions

Changing A Key's Device Type

In most cases, the keys on your remote perform the same functions as the keys on your original remote once you've programmed this remote to control that device. Many keys on your original remote can also be used on this remote as well.

Illuminated POWER key serves as an indicator light to provide feedback.

Device keys (TV, SAT-CBL-OTC, DVD-VCR, DVD-AUX) tell the remote in the right mode to control your device.

GUIDE and MENU put the remote in menu/guide mode; they also access the same features as the keys on your original remotes.

EXIT exits remote programming mode. It also performs the same functions as on your original remotes.

Arrow keys act as navigation remote keys in guide and menu systems.

INPUT-DIGITAL and - (dvd/vcr) key has three functions: (1) if it toggles between the three sources connected to your TV; (2) when the remote is in VCR mode, this button toggles between (A) VCR/VHS input; (3) when you're entering digital channel numbers directly, this button enters the main channel number from the sub-channel number (such as 58.1).

Red, green, yellow, and blue keys access additional features on your cable box, satellite receiver, or DVD disc player (see your device manual for details).

Backlight key turns backlighting on/off.

TIP: Because there are so many codes, you may have to press the POWER key many times—possibly hundreds! of times.

NOTES: Throughout the programming of each key, keep the remote pointed at the IR sensor of the device you are programming the remote to control.

Test the remote with the device to make sure the device key is programmed with the correct code for maximum functionality. If the device still does not work, try a different code. See the "Testing the Code for Maximum Functionality" section below for more information.

During the Manual Code Search, the remote ignores keypresses that aren't part of the search.

The remote will automatically stop programming the POWER key blinks four times and turns off, and the last programmed code under that device key is retained.

The POWER key blinks four times and turns off when the remote has gone through all the codes. The remote exits the Brand Code Search. If your device hasn't turned off yet, try a different search method.

Testing the Code for Maximum Functionality

1. If a variety of the device's functions with the remote, if some features of your devices don't work, go to the next step to try a different code.

2. Repeat the Manual Code Search and Entry Method from the beginning. When the device stops for the first time, don't press the STOP key, which would end the last programmed code. Instead, with the unit now off, continue to press the POWER key repeatedly until it turns back on.

3. Once the unit turns back on, you have found another code that operates the device with the remote key.

4. Test the key functionality again by trying a variety of functions. If the code controls the majority of the device's functions, programming is complete. If the code stored

does not give maximum functionality, try another code.

Resigning the DVD-VCR Key To Control

The DVD-VCR key defaults to control a VCR. You must reprogram the DVD-VCR key to control a VCR.

1. Press and hold the DVD-VCR key. The POWER key illuminates. Keep holding down the DVD-VCR key.

2. While holding down the DVD-VCR key, press the number 2 key on the keypad. The POWER key is now off.

3. Release the DVD-VCR key. The POWER key turns on and then turns off. The DVD-VCR key is now VCR.

4. Follow the directions in the auto, brand, and model code search to program the DVD-VCR key to your original remote.

Resigning the DVR-AUX Key To Control

The DVR-AUX key defaults to control a DVR. You must reprogram the DVR-AUX key to control a different device (an DVB, satellite or cable box, for example), you'll

1. Press and hold the DVR-AUX key. The POWER key illuminates.

2. While holding down the DVR-AUX key, press the number key on the keypad for the device you want to control (see the chart below). The POWER key turns off.

3. Release the DVR-AUX key. The POWER key turns on and then turns off. The DVR-AUX key is now controlling the device type you selected.

4. Follow the directions in the auto, brand, and model code search to program the DVR-AUX key.

Volume Punch-Through

Volume punch-through allows the VOL and MUTE keys to "punch through" to the device currently selected. For example, if you are in TV mode and press the VOL key, it will affect the volume of the TV instead of the remote.

To "punch through" to a device, press the volume key while the device key is selected.

Note: Volume punch-through does not occur as some satellite receivers.

Transport Key Punch-Through

Transport key punch-through allows the transport

PLAY, FORWARD, RECORD, STOP, PAUSE, SKIP, and SEEK keys to "punch through" to the device currently selected.

The remote stays in that device mode until you press a different key.

Note: Transport key punch-through does not occur as some satellite receivers.

IMPORTANT

Because this remote controls more than one device, you must first "set" the remote which device you wish to operate. That means, if you wish to operate your TV, you must first press the TV key to put the remote in TV mode.

The remote stays in that device mode until you press a different key.

Note: If you have trouble operating your device, try pressing the TV key again.

Manual Code Search

The Manual Code Search is the easiest way to program the remote to control a device that does not have a pre-programmed code.

1. Turn on the device you want to control.

2. Turn on the remote.

3. Press and hold the device key.

4. Press and hold the POWER key.

5. While holding down the POWER key, press the number key for the device you want to control (see the chart below).

6. Release the POWER key. The POWER key turns off.

7. Turn off the device.

8. Turn off the remote.

9. Turn on the device.

10. Turn on the remote.

11. Press the device key.

12. Press the POWER key.

13. Turn off the device.

14. Turn off the remote.

15. Turn on the device.

16. Turn on the remote.

17. Press the device key.

18. Press the POWER key.

19. Turn off the device.

20. Turn off the remote.

21. Turn on the device.

22. Turn on the remote.

23. Press the device key.

24. Press the POWER key.

25. Turn off the device.

26. Turn off the remote.

27. Turn on the device.

28. Turn on the remote.

29. Press the device key.

30. Press the POWER key.

31. Turn off the device.

32. Turn off the remote.

33. Turn on the device.

34. Turn on the remote.

35. Press the device key.

36. Press the POWER key.

37. Turn off the device.

38. Turn off the remote.

39. Turn on the device.

40. Turn on the remote.

41. Press the device key.

42. Press the POWER key.

43. Turn off the device.

44. Turn off the remote.

45. Turn on the device.

46. Turn on the remote.

47. Press the device key.

48. Press the POWER key.

49. Turn off the device.

50. Turn off the remote.

51. Turn on the device.

52. Turn on the remote.

53. Press the device key.

54. Press the POWER key.

55. Turn off the device.

56. Turn off the remote.

57. Turn on the device.

58. Turn on the remote.

59. Press the device key.

60. Press the POWER key.

61. Turn off the device.

62. Turn off the remote.

63. Turn on the device.

64. Turn on the remote.

65. Press the device key.

66. Press the POWER key.

67. Turn off the device.

68. Turn off the remote.

69. Turn on the device.

70. Turn on the remote.

71. Press the device key.

72. Press the POWER key.

73. Turn off the device.

74. Turn off the remote.

75. Turn on the device.

76. Turn on the remote.

77. Press the device key.

78. Press the POWER key.

79. Turn off the device.

80. Turn off the remote.

81. Turn on the device.

82. Turn on the remote.

83. Press the device key.

84. Press the POWER key.

85. Turn off the device.

86. Turn off the remote.

87. Turn on the device.

88. Turn on the remote.

89. Press the device key.

90. Press the POWER key.

91. Turn off the device.

92. Turn off the remote.

93. Turn on the device.

94. Turn on the remote.

95. Press the device key.

96. Press the POWER key.

97. Turn off the device.

98. Turn off the remote.

99. Turn on the device.

100. Turn on the remote.

101. Press the device key.

102. Press the POWER key.

103. Turn off the device.

104. Turn off the remote.

105. Turn on the device.

106. Turn on the remote.

107. Press the device key.

108. Press the POWER key.

109. Turn off the device.

110. Turn off the remote.

111. Turn on the device.

112. Turn on the remote.

113. Press the device key.

114. Press the POWER key.
